Global Central Banks sprung in to action after Fed kick-started the monetary easing cycle after a span of 4-years by aggressively reducing rates by 50bps and bringing the benchmark rate to 4.75-5%. ECB had also delivered 25bps rate cut, a second reduction this year. According to the CME Fed watch tool there is a likelihood of 25bps cut in Nov'24. On the other hand, BoE, BoJ and PBoC maintained status quo. In the coming week, investors will turn their focus towards key data prints from US including consumer confidence, PCE index and report on manufacturing. On the domestic front, RBI's bulletin noted the food price volatility continues to remain a contingent risk. It also noted the household consumption is expected to grow at a faster pace in Q2 amidst revival in rural demand and easing of headline inflation.

- Global markets ended mixed as investors continue to monitor the slew of decisions by global Central Banks. FTSE closed lower despite better than expected retail sales data. Sensex rose further by 1.6%, led by strong gains in real estate and capital goods stocks. It is trading further higher today, in line with other Asian markets.

- Major global currencies ended mixed. JPY fell the most, while GBP and CNY gained and EUR ended flat. DXY was also unchanged. Yen depreciated as BoJ signalled that it was in no hurry to hike rates. GBP was supported by higher yields. INR rose by 0.1%, as oil prices eased. It is trading much stronger today, while other Asian currencies are trading mixed.

- Except yields in Asia (flat), 10Y yields elsewhere inched up. US 10Y yield rose the most, by 3bps. Lesser likelihood of a recession in the US (decline in jobless claims) fuelled the rally. BoE's cautionary tone also impacted sentiments in the UK. India's 10Y yield ended flat, even as oil prices fell. It is trading flat even today.
