Flash US PMI noted the growing strength in the economy (54.3 from 54 in Sep'24) supported by uptick in business activity, with growth driven by services sector. On the other hand, Eurozone continues to struggle with PMI reading remaining in the contractionary zone (49.7 in Oct) and downturns noted in both France and Germany. Separately, jobless claims in the US dropped below estimates to 227k signalling strength in the labour market. On domestic front, flash manufacturing PMI for Oct'24 inched up to 58.6 from 58.3 in Sep'24. The improvement was supported by expansion in both new orders and export orders at a much faster pace. Though, manufacturer's profit margin remained under pressure due to higher input price inflation. Services PMI too inched up to 57.9 (from 57.7). Additionally, there was also a pick-up in hiring activity especially in service sector.

- Global indices ended mixed. Investors continue to monitor corporate results, jobless claims and awaited the outcome of the US Presidential election. Amongst other indices, Hang Seng dropped the most followed by Shanghai Comp. Sensex ended flat and is trading lower today. Asian stocks are trading higher ahead of the key elections in Japan and after PBoC kept rates on hold.

- Except INR, other global currencies appreciated against the dollar. After rising by nearly 1% in the last 3 sessions, DXY fell by 0.3%. Investors monitored macro data including US jobless claims and flash PMI. Focus remains also on the US Presidential Elections. INR ended flat near its record low. It is trading at similar levels today, while Asian currencies are trading mixed.
