Both BoJ and US Fed are scheduled to announce their respective policy decisions later this month. It is almost certain (~97% chance as CME Fed WatchTool) that Fed will keep rates on hold, even as US PPI has come in lower (0.2% in Dec'24 versus 0.4% in Nov'24) than expected (0.3%). This is most likely due to seasonal effects. In case of BoJ, some analysts are expecting rates to be on hold, while others are expecting a rate hike, as the central bank presents its new inflationary forecasts, and takes into account developments post President-elect Trump's swearing in. Japan recently posted a current account surplus of 3.35tn Yen in Nov'24, supported by goods trade surplus of 97.9bn Yen (683.3bn Yen deficit in Nov'23), driven by weaker currency. India's WPI growth shows price pressures going up, given sticky food inflation and slower deceleration in fuel and manufactured product inflation.

- Barring FTSE and Nikkei, other global indices ended higher. US indices closed in green after softer than expected PPI and awaited the earnings report. Both Hang Seng and Shanghai Comp advanced amidst news report of US tariff relief talks. Sensex rebounded supported by a rally in global stocks, easing inflation and strong IIP data. It is trading higher today in line with other Asian stocks.

- Global currencies ended mixed. Dollar index retreated from a 2-year high given the news of gradual tariff imposition by US and ahead of CPI data. INR remained under pressure as it depreciated further (steepest fall in over 2-years) given FPI outflows. However, it is trading stronger today, while other Asian currencies are trading mixed.

- Global 10Y yields closed mixed. US10Y yield rose a tad by 1bps, even after muted PPI print. Japan's 10Y yield rose by 4bps, to reach its highest since Apr'11. At the longer-end (40Y), the rise was even steeper. BoJ is expected to hike rates in the coming months. India's 10Y yield fell by 3bps, tracking decline in oil prices. It is trading further lower today at 6.81%.
