Macro developments

- In an effort to improve digital penetration in the economy, RBI has extended the scheme for encouraging deployment of Point of Sale (PoS) infrastructure to street vendors covered under the PM SVANidhi programme in Tier-1 and Tier-2 centres. Previously, it was available for Tier 3-Tier 6 centres only. The Payments Infrastructure Development Fund (PIDF) was created with a corpus of Rs 3.45bn for digital payments facilitating the beneficiaries under PM SVANidhi.
- US GDP growth was revised up to 6.6% in Q2CY21 from an initial estimate of 6.5% and 6.3% in Q1CY21. This was led by upward revisions to non-residential fixed investment and exports. However, private inventory investment and government spending were revised downwards. Separately, US jobless claims for the week ended 21 Aug 2021 rose for the first time in 5 weeks to 353k (est. 350k) from 349k. Despite this, claims still remain at a pre-pandemic low. In fact, the 4-week moving average of claims fell to 367k, a new pandemic low.
- China's industrial profits moderated to 16.4% in Jul'21, from 20% in Jun'21. While this was partly owing to base effect, elevated commodity prices and supply chain bottlenecks also contributed to slowing profit growth. Shortage of computer chips has led to 4th consecutive decline in automobile production. However, profits of pharmaceuticals, mining and raw material manufacturing were robust. The unevenness in recovery has raised hopes for government stimulus in near-term.
