26 April 2021

### Macro developments

- As per CMIE data, India's unemployment rate (30-day moving average) rose to 7.74% as on 23 Apr 2021 from 7.31% in the previous week. Both rural and urban unemployment rose to 7.17% and 8.99% respectively from 6.74% and 8.58% in the previous week. Further, state specific lockdown to contain the pandemic is likely to take a hit on the print in the coming months.
- Global flash PMIs for Apr'21 indicate that manufacturing activity surged significantly in US, UK and Eurozone. UK PMI jumped to 60.7 (~27-year high) versus 60.3 in Mar'21 and Eurozone PMI reached 63.3 (series high; 62.5 in Mar'21). However, within Eurozone, both Germany and France reported marginal slowdown in activity. New export orders remained subdued while domestic orders supported growth. Global services activity too remained buoyant, with improvement seen across regions.
- New home sales in the US rebounded more than expectation and surged by 20.7% in Mar'21 after dropping by 16.2% in Feb'21. The annualised sales were pushed to 1.02mn, fastest increase since CY06 and is led by robust demand and lower borrowing costs. The median sale price of new house rose by 0.8% (US\$ 330,800) on a YoY basis in Mar'21.
