Macro developments

- In a bid to provide stimulus for road infrastructure, NHAI is expected to address concerns on multiple fronts. 1) Almost Rs 850bn will be raised through 'asset recycling/restructuring', in addition to funding raised via banks and markets. 2) To reprieve private investment, loopholes in BOT scheme will be addressed. 3) Projects will also be considered on corridor level (vs individual stretches) to make them more financially viable.
- In a relief to worries over slowdown in US economy, factory orders rose by 1.4% on a MoM basis in Jul'19 (0.5% in Jun'19) on the back of improvement in new orders from transportation (aircraft). Both durable and non-durable goods orders rose by 2% and 0.8% in Jul'19. US jobless claims increased marginally by 1,000 to 217,000 for the week ending 31 Aug 2019.
- On the back of trade tensions, Germany suffered a major blow with its factory orders plunging by (-) 2.7% in Jul'19 on a MoM basis. Both domestic and foreign orders decelerated to 0.5% and 4.2% in Jul'19. This adds on to the growing signs of weakness to Germany's export reliant economy, as its GDP has already contracted in Q2CY19 and is likely to contract again in Q3CY19.
