

MACRO DAILY

07 February 2020

Macro developments

- RBI's MPC members kept policy rate and stance unchanged and reiterated room for further rate cuts. More importantly, it withdrew the 1% ceiling on banks' borrowing from RBI and introduced LTROs. It also incentivised banks to deduct auto, mortgage and MSME loans from CRR computation and extended sops to commercial real estate projects. We believe these measures are structurally positive and send signal to banks to lend.
- US jobless claims fell to a 9-month low to 202,000 for the week ended 1 Feb 2020, (est. 216,000) pointing to buoyant labour market conditions. The 4-week moving average was also lower by 3,000 to 211,750 from 214,750 in the previous week, lowest since Apr'19.
- Germany's new manufacturing factory orders declined by (-) 2.1% in Dec'19 from (-) 0.8% in Nov'19. This was led by new export orders (-4.5% vs -2.5%), in particular from Euro Area (-13.9%). Demand from other countries rose by 2.1% and domestic orders too increased (1.4% vs 1.3%). Orders for investment goods fell the most by (-) 20% in Dec'19.
