### Macro developments

- According to 2<sup>nd</sup> advance estimates, India is expected to clock a record foodgrain production which is 2.4% (291.95mn tonne in AY20) higher than last year. This is led by jump in production of both rice and pulses registering above its 5-year average production. Notably, production of both cotton and jute & mesta rebounded by 24.4% and 39.3% respectively. Overall, spike in production is also attributable to south-west monsoon which was 10% higher than LPA.
- US Fed minutes pointed out that current monetary policy stance is appropriate. Further, FOMC signalled to hold rate steady, as growth is likely to continue at a moderate pace. Minutes also discussed use of three inflation range; that would indicate whether Fed would be willing to tolerate a rise above or fall below the target (2%) for a period of time.
- Japan's exports contracted for the 14th straight month by (-) 2.6% in Jan'20 vs (-) 6.3% in Dec'19. Region wise, exports to US (-7.7%) and Asia (-3.2%) fell the most.
